

Small Group Instruction in Math a balanced approach

150 + minutes of recorded content

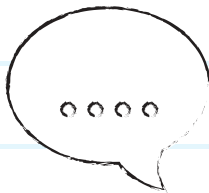

Essential Questions

- Why would we run small groups?
- How do we organize small groups around the room?
- How do we group students and when do we pull them?
- What do we do with the students in the teacher group?
- What do we do with the students not meeting with the teacher?
- What norms and structures should be in place?
- What about intervention, enrichment, tier 1,2, and 3?

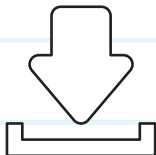

In this mini course you will receive the frameworks for successful implementation of small group work. You will also learn about a balanced approach with whole group instruction and about the teacher's role in the small group.
